SKILLS

Automation & Low-Code: Power Automate, Zapier, Retool, Airtable, PowerApps, Workflow Automation, API Integration, Enterprise CRM (28-state rollout)

AI / Vibe Coding: Claude, Emergent, Cursor, v0, Lovable, Base44, Supabase, LangChain, Hugging Face

Product & Analytics: Jira, Figma, Mixpanel, Amplitude, Google Analytics, Tableau, Power BI, SQL, Python, RICE Prioritization

WORK EXPERIENCE

InBody India — Support Engineer (Product + Operations)

Jun 2024 - Jun 2025

- Architected enterprise CRM across 28 states using Power Automate and SQL, processing 150+ daily tickets at 98% resolution rate and saving \$5K per quarter in operational costs
- Launched InBody Touch diagnostic system from concept to market using RICE prioritization and user research with 200+ healthcare professionals, driving 60% cost reduction and 35% diagnostic accuracy improvement
- Led 12-engineer cross-functional team through Agile sprints to reduce mean time to resolution 80% (5 hours to 1 hour) and lift NPS by 42 points via process standardization and knowledge-base automation
- Drove roadmap decisions from top 15 customer pain points identified in Power BI and SQL analytics, increasing retention 28% and reducing churn from 18% to 13%

Fuse Bytes — Product Development Intern

Feb 2023 - May 2023

- Shipped 2 MedPlus Bytes CRM features across 4 Agile sprints to 2,500+ daily users, hitting 70% adoption and lifting CSAT from 72 to 87 (+15 points)
- Optimized dashboard performance via A/B testing to cut page load time 30% (4.2s to 2.9s) and improve task completion rate 38%, impacting 10K+ monthly transactions
- Triaged and resolved 15 high-priority UI/UX bugs in Jira from 50+ usability testing sessions, partnering with Engineering and Design to launch features 2 weeks ahead of schedule

LEADERSHIP

VLABS Digital Communication Platform — Product Lead (GOLC Winner 2024)

2024

- Owned full product lifecycle from discovery to launch, synthesizing 50+ student and faculty interviews into personas and requirements that aligned technical build to educational objectives
- Collaborated with 8 academic stakeholders to prioritize roadmap, delivering MVP that reached 85% student engagement and 40% learning-outcome improvement for 300+ users
- Built interactive simulation modules in JavaScript and ReactJS, tracked engagement and assessment scores in analytics, and iterated to 100% curriculum alignment

RUST-E: AI-Powered Corrosion Monitoring — Product Manager (AVEVA Innovation Challenge 2025)

2025

- Led 4-member team to deliver edge-AI corrosion-detection prototype hitting 94% accuracy in 10-week timeline, projecting 75% reduction in industrial inspection time
- Conducted interviews with 3 industry partners, built low-code monitoring dashboard, and pitched pricing + go-to-market strategy to competition judges

Web Registration System — Product Lead (Samarth Vasantik Kreedha Prashikshan Shibir)

2024

- Shipped full-stack registration system for 500+ participants using ReactJS and Zapier, automating 90% of manual processing and achieving 98% user satisfaction through iterative UAT with 5 non-profit stakeholders
